

Technical

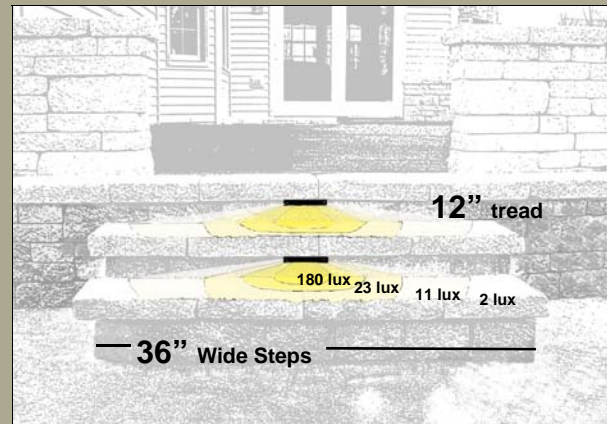

Photometric Information

Typical Lighting of Step treads

Your illumination may vary based on color of hardscape material due to reflectance factors

Recommended lighting output for safety and security on outdoor steps is .50 fc
This factor may vary according to local codes

Symmetrical Light Distribution

Illumination measurement or quantity of light generated ...
approximate conversion is 1fc = .0929 lux
Measurement based on using 10 watt Xenon Lamp and 12.0 volts

Measurements are approximate
